

How do my favourite toys and games compare with those of my parents and grandparents?

First we will start by thinking about our favourite toys today. Then we will find out about the toys that our family played with when they were children. We will create a timeline of toys going back 50 years. We will also sort old and modern toys.

A brown teddy bear is standing against a blue wooden background. The bear has a light-colored snout and is waving with its right paw.

Modern

Many toys that our grandparents played with, we still play with today!
